

$$A = \{a \mid |w_x| = w\} \in PR \Rightarrow \bar{K} \leq A \quad (x \leq \bar{A})$$

$$PR \ni \bar{A} = \{a \mid |w_x| \neq w\} \quad \text{Trovo Subito Negato}$$

Se Entrambi Sono produttivi allora dimostro Tramite la Riduzione funzionale

Inizio con $A \in PR$

$$\psi(x, y) = \begin{cases} 1 & \text{Se } x \in K \\ \uparrow & \text{Altrimenti} \end{cases}$$

Per smn

$$= \varphi_{g(x)}(y)$$

```

input(x, y)
Costruisco  $\varphi(x)$ 
stop := false
WHILE ( $\neg$  stop) {
    Next-Step  $\varphi_x(x)$ 
    IF  $\varphi_x(x) \downarrow$  THEN RETURN 1
}

```

Se $x \notin K \Rightarrow \forall y. \Psi(x, y) \uparrow$

$\Rightarrow \forall y. \varphi_g(x)(y) \uparrow$

$\Rightarrow W_{g(x)} = \emptyset$ ma non va bene

Ma:

$\Psi(x, y) = \begin{cases} 1 & \text{Se } \varphi_x(x) \downarrow \text{ in meno di } y \text{ passi} \\ \uparrow & \end{cases}$

input(x, y)

stop := false

Step := 0

Costruisco φ_x

WHILE Step < y && $\neg$ stop {

Next-Step $\varphi_x(x)$

IF $\varphi_x(x) \downarrow$ THEN stop = True

ELSE

Step++

}

IF stop == false

RETURN 1;

ELSE

WHILE (TRUE)

$$\text{Se } x \notin K \Rightarrow \forall y. \Psi(x, y) \downarrow$$

$$\Rightarrow \forall y. \varphi_{g(x)}(y) \downarrow$$

$$\Rightarrow \omega_{g(x)} = \mathbb{N}$$

$$\Rightarrow |\omega_{g(x)}| = \omega$$

$$\Rightarrow g(x) \in A$$

$$\text{Se } x \in K \Rightarrow \exists n_0 \in \mathbb{N} \quad \Psi(x, y) \downarrow \text{ in } n_0 \text{ Passi}$$

$$\Rightarrow \exists n_0 \in \mathbb{N} . \varphi_{g(x)}(y) \downarrow \text{ in } n_0 \text{ Passi}$$

$$\{y \mid y < n_0\}$$

$$\Rightarrow \text{ed } \bar{e} \text{ un Intervallo. } |\omega_{g(x)}| = |[0, n_0 - 1]| \neq \omega$$

Prova Ora $\bar{A} \in PR$

$$\Psi(x, y) = \begin{cases} 1 & x \in K \\ \uparrow & \end{cases}$$

$x \in K$ (Sempre Stesso PSEUDOCODICE)

$$\forall y. \Psi(x, y) \downarrow$$

$$\forall y. \varphi_{g(x)}(y) \downarrow \Rightarrow |\omega_{g(x)}| = \omega \Rightarrow g(x) \in A$$

$$x \notin K \Rightarrow \forall y. \Psi(x, y) \uparrow$$

$$\Rightarrow \forall y. \varphi_{g(x)}(y) \uparrow$$

$$\Rightarrow |W_{g(x)}| = \emptyset$$

$$\Rightarrow |W_{g(x)}| \neq \omega \Rightarrow g(x) \notin A$$

$$A = \{x \mid W_x = [0, 10]\} \in PR$$

$$\bar{A} = \{x \mid W_x \neq [0, 10]\} \in PR$$

Devo Verificare Per Tutti gli Altri ∞ Input che non Appartengono Quindi PR

~~///~~ $A \in PR$:

$$\Psi(x, y) = \begin{cases} 1 & x \in K \vee x \in [0, 10] \\ \uparrow \end{cases}$$

$$\text{Se } x \notin K \Rightarrow \Psi(x, y) \downarrow \stackrel{SSE}{\iff} y \in [0, 10]$$

$$s.m.n \Rightarrow \varphi_{g(x)}(y) \iff y \in [0, 10]$$

$$\Rightarrow W_{g(x)} = [0, 10]$$

$$\Rightarrow g(x) \in A$$

Se $x \in K \Rightarrow$ Converge Sempre

$$\Rightarrow \Psi(x, y) \downarrow$$

$$\Rightarrow \varphi_{g(x)}(y) \downarrow$$

$$\Rightarrow W_{g(x)} = \mathbb{N} \neq [0, 10]$$

$$\Rightarrow g(x) \in A$$

Per $\bar{A} \in PR$

Prima Verifico Questa e Poi Altro

$$\Psi(x, y) = \begin{cases} 1 & x \in K \wedge y \in [0, 10] \\ \uparrow & \end{cases}$$

$$\begin{aligned} \text{Se } x \notin [0, 10] &\Rightarrow \text{diverge } \forall y \quad \Psi(x, y) \Rightarrow \varphi_{g(x)}(y) \uparrow \\ &\Rightarrow |W_{g(x)}| = \emptyset \\ &\Rightarrow g(x) \notin A \end{aligned}$$

$$\begin{aligned} \text{Se } x \in K &\Rightarrow \Psi(x, y) \downarrow \Leftrightarrow y \in [0, 10] \\ &\Rightarrow \varphi_{g(x)}(y) \downarrow \Leftrightarrow y \in [0, 10] \\ &\Rightarrow |W_{g(x)}| = [0, 10] \\ &\Rightarrow g(x) \in A \end{aligned}$$

$$A = \{x \mid \varphi_x \text{ non } \bar{e} \text{ Crescente } \vee \text{Range}(\varphi_x) \neq W_x\}$$

$$\bar{A} = \{x \mid \varphi_x \bar{e} \text{ Crescente} \wedge \text{Range}(\varphi_x) \neq W_x\}$$

devo dire che non è decrescente o l'insieme degli output deve essere Uguale al dominio

in $A \in PR$ quindi

$$\psi(x, y) = \begin{cases} y+1 & \text{se } x \in K \\ \uparrow & \end{cases}$$

$$\text{Se } x \notin K \Rightarrow \forall y. \psi(x, y) \uparrow$$

$$\Rightarrow \forall y. \varphi_{g(x)}(y) \uparrow$$

$$\Rightarrow W_{g(x)} = \text{Range}(\varphi_{g(x)}) = \emptyset$$

$$\Rightarrow \varphi_{g(x)} \text{ non } \bar{e} \text{ definita}$$

$$\Rightarrow g(x) \notin A$$

$$\text{Se } x \in K \Rightarrow \dots \Rightarrow W_{g(x)} = \mathbb{N} \text{ (Perché non ha lo 0)}$$

$$\Rightarrow \text{range}(\varphi_x) = [-1, +\infty)$$

$$\Rightarrow g(x) \notin A$$

Per $\bar{A} \in PR$

$$\Psi(x, y) = \begin{cases} y+1 & \text{se } \varphi_x(x) \downarrow \text{ in meno di } y \text{ passi} \\ \uparrow & \end{cases}$$

$$\text{Se } x \notin K \Rightarrow \dots \Rightarrow W_g(x) = \mathbb{N}$$

$$\Rightarrow \text{Range}(\varphi_g(x)) = [1, +\infty)$$

$$\Rightarrow g(x) \notin A$$

$$\text{Se } x \in K \Rightarrow \dots \Rightarrow W_g(x) = [0, n_0 - 1]$$

$$\Rightarrow \text{Range}(\varphi_g(x)) = [1, n_0]$$

Ma $\text{Range} \neq \text{dominio}$ quindi NO

$$\Psi(x, y) = \begin{cases} 0 & y = 1 \\ 2 & y = 2 \\ 1 & x \in K \\ \uparrow & \end{cases}$$

$$\text{Se } x \notin K \Rightarrow \Psi(x, y) \downarrow \Leftrightarrow y \in [1, 2]$$

$$\Rightarrow \varphi_g(x)(y) \downarrow \Leftrightarrow y \in [1, 2]$$

$$\Rightarrow W_g(x) = [1, 2]$$

$$\Rightarrow \text{Range} = \{0, 2\}$$

$$\Rightarrow \text{Range} \neq \text{dominio} \Rightarrow g(x) \notin A$$

$$\text{Se } x \in K \Rightarrow \dots \Rightarrow W_{g(x)} = \mathbb{N}$$

$$\Rightarrow \text{Range} = \{0, 1, 2\} \text{ e } f_2 \text{ Nemmeno Crescente}$$

$$\Rightarrow g(x) \in A$$

$$A = \{x \mid W_x = \text{Range}(p_x)\} \text{ e } \bar{A} = \{x \mid W_x \neq \text{Range}(p_x)\}$$

$$A \in PR: \quad \psi(x, y) = \begin{cases} 1 & x \in K \\ \uparrow \end{cases}$$

$$\text{Se } x \notin K \Rightarrow \text{Dom \& Range sono vuoti}$$

$$\Rightarrow g(x) \in A$$

$$\text{Se } x \in K \Rightarrow \dots \Rightarrow W_{g(x)} = \mathbb{N}$$

$$\Rightarrow \text{Range}(\psi_x) = \{1\}$$

$$\Rightarrow \text{Range} \neq \text{dom} \Rightarrow g(x) \notin A$$

Per $\bar{A} \in PR$

$$\Psi(x, y) = \begin{cases} \uparrow \text{ alt } \downarrow \end{cases}$$

$$\bar{K} \leq \bar{A} \\ (K \leq A)$$

$$\text{Se } x \notin K \Rightarrow \text{Range} = \{0\}$$

$$\Rightarrow W_{g(x)} = \{1\}$$

$$\Rightarrow g(x) \notin A$$

$$\text{Se } x \in K \Rightarrow \text{Range } \Psi_{g(x)} = \{0, 1\}$$

$$\Rightarrow W_{g(x)} = \{1, 0\}$$

$$\Rightarrow g(x) \in A$$

$$A = \{x \mid w_x = K\} \quad \text{e} \quad \bar{A} = \{x \mid w_x \neq K\}$$
